DACH-LED Round Architectural LED Channel

Job Information

Type:	
Catalog #:	
Project:	
Comments:	
Prepared by:	

Description

The DACH-LED round series is a functional and multi-purpose channel family that incorporates premium performance and construction durability. The performance and application versatility makes this fixture usable in every application. This fixture can be installed using various mounting methods and numerous options and accessories are available (see Page 2). The DACH-LED round series can be the illumination solution in commercial, industrial, institutional and retail applications. An excellent choice for storage/utility areas, coves, display cases, shops, task and general area lighting.

Ordering Information

Example: (DACH-LED-4-46-40-UNV-R-DM-EM)

Digitize your light.®

Features

- Die formed channel.
- Powder coated white enamel finish after fabrication.
- Easy wireway access/wireway cover removed without tools.
- Numerous KOs for easy installation.
- Also available in tandem 8' lengths, and tandem wired 16' lengths.
- UL listed for damp location
- LED driver is 0-10V dimming standard.
- OPTICS: Architectural frosted diffuse lens eliminates pixelation, improves uniformity and minimizes glare.
- DLC Premium Listed for utility rebates (see DLC matrix below for more information)
- Operating Temperature: -20°C to +50°C Ambient
- Performs at up to 130 lumens per watt; CRI: 80+
- Lifetime Ratings - L90: 112,000 hours; L80: 224,000 hours
- EM-Emergency to provide 16W (2000 Lumens) MAX load for 90 min.

Mounting Details

- A: End Cap
- B: Suspension-mount with v-hook drill template
- C: Surface Mount
- D: T-Bar Clip Mounting hole
- E: Wiring Knockout

Motion Sensor Option

Step Dimming & Bi-Level

FSP-201B

The FSP-2x1B is a family of passive infrared (PIR) outdoor sensors that raise or lower the electric lighting level to high, low or off based on motion and/ or daylight contribution. Typically, once the sensor stops detecting movement and the time delay elapses, lights will first fade to low mode, and eventually switch off. When motion is detected, the sensor ramps the light level to high mode unless the daylight contribution is sufficient.

The integral photocell can also switch the lights on and off for dusk to dawn control, so that lighting remains on overnight even without motion detection.

The sensors control 0-10VDC or nondimming LED drivers or ballasts. The low voltage FSP-201B may be used with dim-to-off drivers or ballasts. Initial setup and subsequent sensor adjustments are made using a Wireless Handheld Configuration Tool (FSIR-100). This tool enables adjustment of sensor parameters including high/low mode, sensitivity, time delay, cut off and more.

The FSIR-100 can read current parameter settings, and stores up to six sensor parameter profiles to speed commissioning of multiple sensors. The FSP-2x1B family is available in three configurations for mounting inside a fixture, to the outside of a fixture or enclosure via a 1/2" knockout, or to a pole.
