

## RoHS Compliance of Deco Lighting LED Lighting Products

All DECO Lighting LED luminaires on the website and in our LED catalogs from 2016 to present comply with the Restriction of the Use of Certain Hazardous Substances (RoHS) in Electrical and Electronic Equipment as of February, 2018.

The LED chipsets used in the luminaires are Pb-free soldering compatible (Max Soldering Temp. 260 deg. C) so that these LEDs can be used as environmentally safe products.

If you have any questions or concerns regarding the RoHS status of our LED lighting fixtures, please contact our support team and they will be happy to address your concerns in a timely manner:
